

Back to Work on America's Roofs

A coalition of leading roofing industry associations has launched an initiative which recommends key policies designed to: create jobs for unemployed Americans; support homeowners' investments; and encourage business owners to invest in capital improvement projects. In a statement outlining the goals of the initiative, the group underscored the critical and essential nature of the roof to a building and the industry's ability to hire the unemployed immediately, and put them to work safely.

**Provide the
first line
of defense
in protecting
homes and
businesses**

**Fill the
skills
gap and
provide
jobs**

**Encourage
short-term
relief for
long-term
success**

**Expand tax
policies
that work**
